Element Controller WiFi-RF4

Product information "Element Controller WiFi-RF4"

CONTROLS / ELEMENT SERIES
For comfortable control of LED strips and low-voltage lights, we offer various systems. You can choose between wireless, Wifi or DMX connection and benefit from the respective advantages.
Controller WiFi-RF4
The Litegear Element Wifi / Wireless Transmitter is a gateway to integrate a smartphone or a tablet into the control system. You can control the appropriate controller either via radio remote control, wireless wall remote control or via smartphone app.
With this smart lighting control, you can combine or expand your ideas with different types of control. You create a Wifi connection between your input device and the LG5423. Use the app to select the type of control. The basic building block of this system is a wireless controller RGB (W), dual white or single color LED technology. The Controller requires an external power supply.
Properties:
   One Wifi receiver is needed per zone
   Transfer of scenes and fades
   A suitable app for your smart phone, EASYLIGHTING, EASYCOLOR, REALCOLOR, can be downloaded from the App Store.

Technical Details:
